About Me

Vocational education specialist with a bachelor's degree from Al-Balqa Applied University and a master's degree in Curriculum and Teaching Methods of Vocational Education from Yarmouk University (expected 2025). Passionate about integrating educational technology, curriculum development, and innovative teaching methods that bridge theory with practice. I am interested in research related to vocational education, teacher training, and linking education with labor market needs.

Experience

Vocational Education Teacher | Jordan | 2020 – 2022

- Conducted vocational education instruction for middle and high school students.
- Designed and implemented lesson plans aligned with the national curriculum.
- Integrated educational technology into teaching and assessments.
- Participated in school-based professional activities and student training.
- Collaborated with educational teams to support academic and vocational learning outcomes.

Lecturer | Jadara University | 2022 – Present

- Deliver undergraduate-level lectures and practical sessions in accordance with approved academic curricula.
- Design, update, and implement course syllabi, instructional materials, and assessment tools aligned with university and accreditation standards.
- Evaluate student performance through examinations, coursework, projects, and continuous assessment methods.
- Integrate educational technologies and digital learning platforms to enhance teaching effectiveness and student engagement.
- Supervise and mentor students in academic projects and research-related activities.
- Participate in departmental and university academic activities, committees, and quality assurance initiatives.
- Collaborate with faculty members to support curriculum development and continuous improvement of teaching and learning outcomes.

Volunteering & Projects

- Provided unpaid academic support to university students through tutoring and group sessions.
- Assisted in project planning, research guidance, and academic writing.
- Delivered lectures using digital tools, enhancing students' understanding of computer-based applications in education.
